B. OTHER ACTIVITIES

1. [] has completed, and we have forwarded to C/FE a proposal for a long-range area training program on the Far East, tailored to FE requirements and pressures. This represents a new and perhaps more realistic approach to the problem of area training for the Clandestine Services. It is hoped that [] loan to us may be extended during the period of discussion of the program with FE, particularly as [] has done such thorough work on the proposal.
2. Cancellation of the September offering of the IOE will not soften or discourage our efforts to establish this program as an integral part of OTR. [] are continuing preparation of material and development of new approaches. A preliminary check with [] indicates that both [] are bringing back much worthwhile material from the Second Maxwell Institute.
3. At FSI's request, through [] LAS provided informal support for their continuation of their Hungarian program, in anticipation of future utilization by us.
